## Leading the next wave of AI driven cybersecurity growth

Buy

**Strategic software shift powers strong growth.** CYBR reported strong financial performance in 2Q25, reinforcing the success of its strategic pivot from a service-based business model to a scalable, software-driven technology company. This transformation is clearly reflected in its 2Q25 revenue of IDR 95.0 billion (+54.5% YoY). Growth was supported by robust performances in both the Services segment, which generated IDR 72.0 billion (+51.2% YoY), and the Software Services segment, which contributed IDR 20.7 billion (+49.8% YoY). CYBR's geographic diversification continues to bear fruit, with revenues from Indonesia reaching IDR 47.7 billion (+28.0% YoY), while Singapore and Australia delivered significant growth of IDR 31.7 billion (+81.9% YoY) and IDR 15.6 billion (+129.0% YoY), respectively. These figures highlight the company's growing international footprint and success in tapping regional demand for cybersecurity solutions. For 1H25, CYBR booked total revenue of IDR 230.4 billion (+108.5% YoY) achieving 37.8% of our full-year forecast. More notably, the Software Services segment now contributes 47.9% of total revenue in 1H25, compared to only 20.1% in 1H24, a testament to CYBR's successful shift toward proprietary, high-margin products such as its IntelliBron cybersecurity platform.

**Recovery in motion, despite one-off charges.** CYBR managed to keep its cost of revenue well contained at IDR 48.5 billion (+9.0% YoY) in 2Q25, resulting in a gross profit of IDR 46.5 billion (+173.8% YoY). For 1H25, gross profit soared to IDR 120.0 billion (+332.3% YoY). This drove a significant improvement in gross margin, rising from 25.1% in 1H24 to 52.1% in 1H25. The margin expansion underscores the cost-efficiency of CYBR's software-based business model, which allows the company to increase sales volume without corresponding increases in delivery costs. Products like IntelliBron offer recurring revenue opportunities and enable CYBR to break free from the limitations of headcount-based service capacity. At the operating level, CYBR recorded an operating profit of IDR 1.8 billion in 2Q25 and IDR 42.5 billion for 1H25, translating to an 18.4% operating margin for 1H25. This marks a notable turnaround from the IDR 30.6 billion operating loss posted in 1H24, highlighting the continuation of the company's profitability recovery that began in 4Q24. It's worth noting that 2Q25 results were affected by a non-recurring charge of IDR 4.6 billion related to the impairment of trade receivables.

**Earnings momentum builds in anticipation of robust 2H outlook.** Net profit reached IDR 1.8 billion in 2Q25, a turnaround from a net loss of IDR 13.8 billion in 2Q24, while 1H25 net profit totaled IDR 36.7 billion. Historically, CYBR's earnings have shown a strong bias toward the 2H of the year due to seasonal spending patterns. In 2023, for example, the company recorded a net loss of IDR 28.7 billion in 1H, which narrowed to just IDR 7.0 billion in 2H. Similarly, 1H24 saw a net loss of IDR 28.0 billion, followed by a profitable 2H24 with IDR 28.8 billion in net profit. These patterns are consistent with industry seasonality, where cybersecurity spending typically increases in the 2H of the year due to corporate budget renewals, year-end IT procurement, and compliance deadline pressures. Looking forward, CYBR appears well-positioned for continued growth and profitability in 2H25. The company is maintaining its strategic momentum by reinvesting all FY24 profits into retained earnings rather than distributing dividends, a move that supports expansion and R&D.

**Valuation.** Backed by proprietary technology, international growth, and a shift toward recurring revenues, CYBR is expected to reach IDR 125.3 billion in net profit for FY25F and IDR 235.5 billion in FY26F, with ROE projected at 55.1% and 47.1%, respectively. We reiterate our Buy recommendation with a target price of IDR 1,460, which implies a 16.7x FY25F P/S and 11.7x FY26F P/S. These valuation multiples remain attractive compared to the industry average of 19.8x, presenting a compelling opportunity given CYBR's strong earnings momentum and growth trajectory.

Current Price (IDR) (29/8)	955

**Regional cybersecurity leader.** PT ITSEC Asia Tbk (CYBR), is a prominent cybersecurity provider in the Asia-Pacific region. With a team of over 350 professionals spread across Indonesia, Singapore, Australia, Mauritius, and Dubai, CYBR delivers comprehensive cybersecurity services. The company evolves from strategic consulting and integrated technology solutions to fully managed security operations.

**Trusted expertise and global standards.** Recognized as a trusted partner across diverse industries, ITSEC Asia is committed to securing digital infrastructure from increasingly sophisticated cyber threats while ensuring compliance with evolving data protection laws and critical infrastructure regulations. The company is verified by BSSN and holds globally respected certifications including ISO 27001, ISO 9001, and ISO 14001, in addition to being an official CREST member. Its technical capabilities are further strengthened by a roster of internationally certified experts holding credentials such as OSCP, OSCE, OSEP, OSWE, CRT, CPSA, CRTP, CISSP, CISA, CISM, CSXF, CSXP, CEH, GPEN, GSEC, GCIA, GCIH, and GDPR.

**Locally developed innovation: IntelliBron.** A cornerstone of CYBR's innovation is IntelliBron, a locally developed, cutting-edge platform designed to detect, analyse, and respond to cyber incidents in real-time. IntelliBron embodies CYBR's mission to accelerate secure and adaptive digital transformation in a rapidly evolving threat environment, offering advanced situational awareness and proactive defence capabilities.

**Strategic roadmap and future ready initiatives.** Looking ahead, CYBR is actively pursuing several strategic initiatives to future-proof its impact. The ITSEC Cyber Academy has been launched to address Indonesia's cybersecurity talent gap by producing industry-ready professionals trained to handle modern and emerging threats. In anticipation of the quantum computing era, CYBR is also investing in Post Quantum Cryptography (PQC). This including specialized PQC training programs through the Academy to equip the next generation of cybersecurity leaders. On the consumer front, CYBR is preparing to launch a mobile focused version of IntelliBron to expand its reach into the underserved B2C market, which has shown promising early interest.

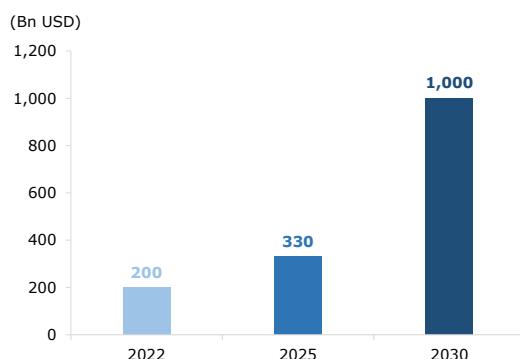

**AI supercharging cybersecurity: Global USD 60B+ market forecast, APAC and Indonesia poised for rapid growth.** AI is swiftly becoming indispensable in cybersecurity, not just an optional enhancement. Globally, AI-powered cybersecurity spending is expected to exceed USD 60 billion by 2028, fueled by enterprises migrating toward predictive and automated defense strategies (Grand View Research). In the Asia-Pacific region, the broader cybersecurity market is projected to grow from USD 74.2 billion in 2025 to USD 141.0 billion by 2030, reflecting a 13.7% CAGR (Mordor Intelligence). Indonesia's cybersecurity sector where AI-enabled solutions are gaining momentum is forecasted to expand from around USD 1.4 billion in 2025 to USD 3.5 billion by 2030, marking a 20.8% CAGR (Mordor Intelligence). While Indonesia remains smaller in absolute terms compared to APAC's largest economies, its rapid growth highlights strong potential for AI-driven cybersecurity investments in the coming years.

## Equity Research

**Key takeaways from ITSEC Cybersecurity Summit 2025.** The ITSEC Cybersecurity Summit 2025, hosted by CYBR in Jakarta from 26–28 August, underscored both the company's strategic role and Indonesia's growing importance in the global cybersecurity landscape. Framed under the theme "The Largest Critical Infrastructure Cybersecurity Event in Southeast Asia", the 3-day summit attracted more than 1,000 participants, including policymakers, regulators, corporate executives, and global experts. With over 40 sessions featuring keynote speeches, panel discussions, and technical presentations, the event not only served as a platform for knowledge exchange but also as a deliberate strategy to align CYBR's brand leadership with its sales growth objectives. This positioning is reinforced by strong market fundamentals, Indonesia's cybersecurity industry is projected to grow at a compound annual growth rate (CAGR) of 9.67%, with revenues expected to reach USD 2.71 billion in 2025 and expand to USD 3.92 billion by 2029. Security Services remain the largest segment, generating an estimated USD 1.66 billion this year, while per-employee spending on cybersecurity is forecasted at USD 18.89, underscoring the increasing prioritization of digital defence. Against this backdrop, the summit's agenda ranging from quantum cryptography to real-world malware case studies and skill-building competitions was not just about awareness, but about preparing industries and governments to seize opportunities in a rapidly expanding market. Crucially, these initiatives are aligned with Indonesia's ambition to be recognized as a regional cybersecurity hub, supporting the resilience of Southeast Asia's digital economy, which is projected to reach USD 1 trillion in GMV by 2030.

**IntelliBroń Aman as a new layer of defence for mobile users against evolving cybercrime.** As part of the ITSEC Cybersecurity Summit 2025, CYBR also held a soft launch of IntelliBroń Aman, a cutting-edge mobile internet cybersecurity platform tailored for mobile subscribers, addressing the increasing risks in today's digital landscape. With critical service providers, such as banking, healthcare, and government agencies, continuing to release mobile applications to enhance user experience, the security of these apps has become paramount. At the same time, cybercriminals are shifting their focus toward individual mobile users, employing increasingly sophisticated attacks that exploit vulnerabilities on mobile devices. IntelliBroń Aman serves as a robust defense layer, delivering comprehensive protection against cyber threats so that users can access essential mobile services with confidence and peace of mind. The platform's uniqueness also offers business added value (BAS) for telecommunication providers, enabling them to deliver security as a subscription-based service to both consumer and enterprise customers on their networks.

**CYBR-Qrypt alliance marks a milestone in Indonesia's quantum-safe security journey.** At the Summit, CYBR formalized a strategic partnership with Qrypt, a US-based leader in quantum cryptography. The collaboration represents a pivotal step in preparing Indonesia for the quantum era, where traditional encryption methods such as RSA and ECC risk being broken by the exponential power of quantum computing. Qrypt's solutions, including Quantum Entropy Appliances, Quantum Entropy-as-a-Service, and Digital Quantum Key Distribution (DQKD), are designed to mitigate these threats and accelerate the adoption of quantum-safe systems. Through this partnership, CYBR will pursue three key priorities: i) advancing research and proof-of-concept testing with universities and global partners to demonstrate post-quantum cryptography (PQC) in areas such as financial transactions, secure communications, and data storage; ii) expanding workforce capacity via the ITSEC Cyber Academy to train professionals in quantum-resilient systems; iii) and leading industry-wide awareness initiatives through events, media, and policy forums to drive PQC adoption.
